

1 SCAN A CAC BARCODE

Aim the USB scanner at the Code 39 strip on the back of the Common Access Card. The app fires automatically when the scanner has sent all **18 characters**.

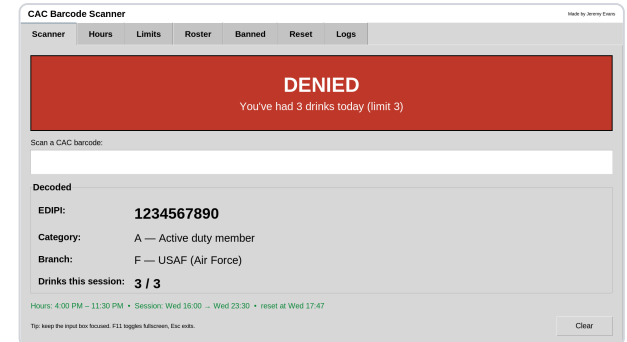

Each scan decodes to **EDIPI** (10-digit DoD ID), **category** (PCC), and **branch**.

2 ALLOWED SCAN

GREEN Banner flashes; this scan counts toward today's drink total.

3 DENIED SCAN

RED Reason is shown under the banner; **not** recorded. scan is

4 THE SEVEN TABS

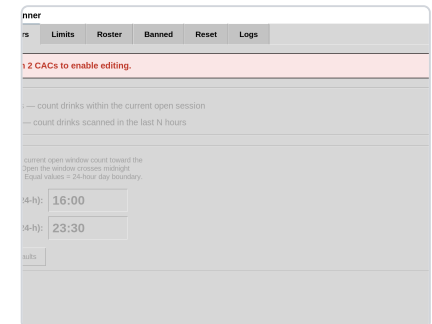

- | | |
|----------------|--|
| Scanner | The verdict banner, input field, and decoded fields. Always returns focus to the input box. |
| Hours | Set bar open/close (HH:MM, 24-h) or switch to a rolling N-hour window. Equal open/close = 24-h day. |
| Limits | Max drinks per EDIPI per session (default 3). Once reached, further scans go red. |
| Roster | Tick the allowed categories (Active Duty, civilian, contractor, etc.) and branches. Use All / None for fast presets. |
| Banned | Per-EDIPI deny list. Blank <i>Expires</i> = permanent; <code>YYYYMMDD</code> for a date-bound ban. |
| Reset | Wipe every EDIPI's drink count for the current window. Two-CAC authorized; logged forever. |
| Logs | Public audit trail: every unlock, settings change, lock, and reset — append-only. |

5 UNLOCK SETTINGS

LOCKED

by default.

- Open any settings tab and click **Unlock**.
- Scan **two different** authorizing CACs.
- Banner turns **UNLOCKED**; edits auto-save.
- Click **Lock** when done — every change is logged.

6 RESET DRINKS FOR THE DAY

- Open the **Reset** tab.
- Click **Reset drinks for the day**.
- Scan **two different** CACs to authorize.
- Counts go to zero; the action is appended to the public log.
